

REMARKS

The applicant thanks the Examiner for the telephone interviews conducted on January 30, 2008 and on February 28, 2007 in which the prior art rejections, particularly the Atkinson reference and distinctions between the instant invention's control of individual components of a computer system were discussed.

The claims of the instant application have been amended in the manner discussed to overcome the prior art rejections based upon Atkinson. Specifically, the claims of the instant application have been amended to require detection of at least two operational parameters of individual components and/or at least two environmental parameters of a computer or processor system. Such a limitation is neither taught nor disclosed in the prior art of record.

Reconsideration of the application as amended respectfully is requested. The foregoing amendment and remarks are believed to be responsive to every matter raised in the office action. If, however, some matter has been overlooked, an opportunity to correct the oversight would be appreciated.

Respectfully submitted,

Bryan P. Stanley
